Game Development

SKILLS

Flutter SDK

● ● ● ● ●

Dart programming language, Flutter SDK and widgets, Responsive mobile UI design, Stateful and stateless widgets, Managing app state with Provider, Async programming with Futures and Streams, REST API and JSON parsing, Network calls with Dio or HTTP package, Local storage with SQLite/Hive

Android SDK

● ● ● ● ●

Java and Kotlin programming, XML for layout designs, SQLite and Room for local storage, REST APIs and Retrofit, RxJava, Dagger dependency injection, MVVM, MVC architectural patterns, Media, handling like camera, audio, video, Location services with GPS, maps, Push notifications with Firebase Cloud Messaging

Laravel development

● ● ● ● ●

PHP, Blade, NPM, MySQL, Eloquent ORM, Authorization with policies and gates, Livewire, Jetstream

Git version control and GitHub

● ● ● ● ●

Web Development

● ● ● ● ●

HTML, CSS, Javascript, Reactjs, NPM, WebPack, Vite, Responsive and mobile-first design, Async/await, Promises, Tailwind CSS,

PROJECTS

Student Management System 🔗

Laravel framework

This project is a Laravel-based API for managing student information efficiently. It provides tools to handle student data, courses, and enrollment through well-defined API endpoints.

QR_Products_Scanner 🔗

Flutter App

This is a Flutter app that allows scanning barcodes and looking up product information.

Note app 🔗

Android Native App

Built an Android app for personal notes using Java and Room persistence library. Utilized MVVM architecture with RxJava for reactive database operations. Designed UI with Activities, Fragments, and RecyclerViews. Integrated Room database with DAO objects for CRUD operations
